

Ribbon Premise 24-144 Fiber

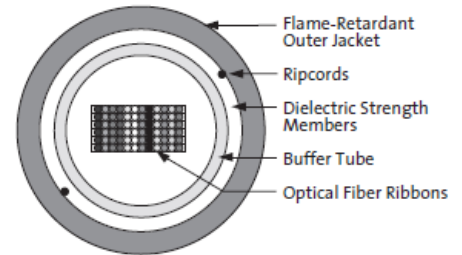

The ribbon premise optical cable is intended for high density installations. The assembly is the ideal cable for factory terminating one end of the cable and mass fusion splicing the pigtail end in a vault or splice panel.

Applications:

- Intra-building backbone
- Central Office
- Data Centers
- High density space constrained distribution points

Features:

- Dry central tube
- Flexible design for indoor routing
- Up to 144 fibers
- Breakout length designed for perfect patch panel fit
- 100% visual and optical performance tested
- Exceed TIA and Telcordia requirements
- Made in USA

Specifications:

- Available in several fiber modes
 - SM Singlemode 8.3/125 um
 - OM-1 Multimode 62.5/125 um
 - OM-2 Multimode 50/125 um
 - OM-3 Multimode 50/125 um Laser Optimized
- Insertion Loss(dB) Singlemode 0.3, Multimode 0.4
- Back Reflection (dB) Singlemode -55 UPC / -65 APC, Multimode <= -25 PC
